

# Solutions and Incentives for Grocery Stores and Supermarkets

On average, supermarkets spend more than \$200,000 on energy costs each year. Saving even \$1 in energy could equate to increasing sales by nearly \$60!\*

## Reduce Overhead and Operating Costs

Refrigeration and lighting account for more than half of the energy use in grocery stores, which use more energy than most other commercial buildings. Energy efficiency improvements can help reduce operating and maintenance costs, plus provide a fast return on investment.

In addition to lowering costs, energy efficiency improvements can enhance store appearance, improve aisle comfort, help prevent food waste and increase visibility in display cases. PECO offers incentives to make your energy-saving upgrade projects affordable.

## Incentives for Energy-Saving Measures

Whether you operate a large supermarket or a corner grocery, you can receive financial incentives for a variety of energy-saving upgrades. PECO energy efficiency solutions include refrigeration controls and motors, LED lighting, cooking equipment and heating, ventilation and air conditioning system upgrades.

We know you're busy, so our energy efficiency representatives are available to help you find smart solutions to control energy costs at your store.

See the chart on the next page for typical energy efficiency solutions for grocery stores and supermarkets.

## Typical Energy Efficiency Solutions for Grocery Stores and Supermarkets

### Interior Lighting Equipment Types

LED Surface and Suspended Linear Fixtures

LED Refrigeration Case Lighting (Reach-In)

LED 4' Replacement Lamps

LED Refrigeration Case Lighting (Open Case)

### Refrigeration

Anti-Sweat Heater Controls

Floating Head Pressure Controls

Evaporator Coil Defrost Controls

ENERGY STAR® Commercial Freezers and Refrigerators

Evaporator Fan Controls

Strip Curtains

Case Light Occupancy Controls

## Why Improve Your Facility's Energy Efficiency?

Nearly 30% of the energy consumed by buildings is used inefficiently or unnecessarily.\* By improving your facility's energy efficiency or integrating energy efficiency into plans for renovations or new construction, you can save on operating costs and create a more comfortable, safer environment for employees and customers. You'll also differentiate yourself as an environmental steward by reducing energy use and greenhouse gas emissions.

## Savings for All

PECO offers solutions and incentives for businesses and organizations large and small. Our solutions cross every sector, from commercial and industrial to nonprofits and government to retail and real estate.

In addition to standard incentives for energy-efficient heating and cooling systems, refrigeration equipment, lighting, variable-frequency drives and custom measures, we offer incentives for whole building systems and new construction.

## Four Easy Steps to Get Started

Contact the PECO team, and we'll help you:

1. Evaluate your energy efficiency opportunities.
2. Choose qualifying equipment and measures.
3. Apply for your incentives.
4. Enjoy all the benefits of energy efficiency.

**New Construction—Whole Building Systems†**  
Comprehensive, building-wide measures including automation and remote systems that improve the facility's overall efficiency.

≥ 10% of Code

**New Construction—Interior Lighting††**  
Construction of a new facility from the ground up or a major renovation with a change of building use.

≥ 10% of Code
