

Solutions and Incentives for Healthcare Facilities

Patient care is a top priority for healthcare facilities. PECO can help you find energy efficiency improvements to lower your operating costs, so you can reinvest the savings in enhancing patient care and retaining qualified healthcare professionals.

Reduce Overhead and Operating Costs

Lighting, heating and cooling account for more than half of the energy use in many buildings, including medical offices. Every dollar a healthcare facility saves through better energy performance is equivalent to \$10–\$20 in new revenue.* When you take control of your energy expenses, you can focus more on your patients, staff and bottom line.

At PECO, we have the technical expertise and financial incentives to help your healthcare facility save energy and money.

Incentives for Energy-Saving Measures

Whether you're looking to reduce the operating costs in your existing facility, constructing a new facility or planning a major renovation, we offer incentives for dozens of proven energy efficiency measures to make your upgrade projects hassle free and affordable.

We know you're busy, and we're here to make increasing your energy efficiency easy. We can help you find smart solutions to control your energy costs and improve your bottom line.

See the chart on the back for typical energy efficiency solutions for healthcare facilities.

Typical Energy Efficiency Solutions for Healthcare Facilities

Interior Lighting Equipment Type

ENERGY STAR® Screw-In Decorative Globes, Decorative Non-Globes or Reflector Lamps

LED Accent/Track Lighting Fixtures

LED Replacement Lamps (Tubes)

LED Low-Bay/Troffer/Surface and Suspended Linear Fixtures

HVAC

Air-Cooled or Water-Cooled Air Conditioners

Exterior Fixtures

LED Wall-Mount Fixtures and Retrofit Kits

LED Parking Garage and Canopy Fixtures and Retrofit Kits

LED Outdoor Flood Light Fixtures

LED Pole/Arm-Mounted Parking and Roadway Fixtures and Retrofit Kits

Why Improve Your Facility's Energy Efficiency?

Nearly 30% of the energy consumed by buildings is used inefficiently or unnecessarily.** By improving your healthcare facility's energy efficiency or integrating energy efficiency into plans for renovations or new construction, you can save on operating costs and create a more comfortable, safer environment for employees and patients. You'll also differentiate yourself as an environmental steward by reducing energy use and greenhouse gas emissions.

Savings for All

PECO offers solutions and incentives for businesses and organizations large and small. Our solutions cross every sector, from commercial and industrial to nonprofits and government to retail and real estate.

In addition to standard incentives for energy-efficient heating and cooling systems, refrigeration equipment, lighting, variable-frequency drives and custom measures, we offer incentives for whole building systems and new construction.

Four Easy Steps to Get Started

Contact the PECO team, and we'll help you:

1. Evaluate your energy efficiency opportunities.
2. Choose qualifying equipment and measures.
3. Apply for your incentives.
4. Enjoy all the benefits of energy efficiency.

New Construction—Whole Building Systems[†]
Comprehensive, building-wide measures including automation and remote systems that improve the facility's overall efficiency.

≥ 10% of Code

New Construction—Interior Lighting^{††}
Construction of a new facility from the ground up or a major renovation with a change of building use.

≥ 10% of Code
