

# Solutions and Incentives for Municipalities

**Managing energy use is one of the most effective ways local governments can control operating costs.**

By taking steps to reduce energy use in publicly owned buildings, you can save taxpayer dollars, improve comfort and demonstrate environmental responsibility. PECO guides you every step of the way, from identifying problem areas to providing incentives for upgrade projects.

## Reduce Overhead and Operating Costs

Towns, boroughs, cities, counties and other government entities are charged with keeping a variety of infrastructure— from courthouses and schools to wastewater treatment plants and traffic signals— operating cost effectively for the benefit of the public.

Heating and cooling can account for 30% of the energy use in public buildings, while lighting accounts for 30%–60% of a municipality’s energy costs.\* These areas represent important opportunities for making energy efficiency improvements.

## Incentives for Energy-Saving Measures

Whether you’re looking to reduce operating costs, constructing a new facility or planning a major renovation, we offer incentives for dozens of proven energy efficiency measures to make upgrade projects cost effective and hassle free.

At PECO, we have the technical expertise and financial incentives to help your facility save energy and money.

See the chart on the back for typical energy efficiency solutions for municipalities.

## Typical Energy Efficiency Solutions for Municipalities

### Interior Lighting

LED Replacement Lamps (Tubes)      LED Low-Bay/Troffer/Surface and Suspended Linear Fixtures  
Lighting Controls

### Exterior Lighting

LED Outdoor Flood Light Fixtures      LED Streetlights

### HVAC

Air Cooled/Water Cooled Air Conditioners/Heat Pumps and Air Cooled Chillers

### Custom Measures

Chiller Plant Optimization, Compressed Air      Plant upgrade/optimization

## Why Improve Your Facility's Energy Efficiency?

Nearly 30% of the energy consumed by buildings is used inefficiently or unnecessarily.\*\* By improving your facility's energy efficiency or integrating energy efficiency into plans for renovations or new construction, you can save on operating costs and create a more comfortable, safer environment for employees and visitors. You'll also show your environmental stewardship by reducing energy use and greenhouse gas emissions.

## Savings for All

PECO offers solutions and incentives for businesses and organizations large and small. Our solutions cross every sector, from commercial and industrial to nonprofits and government to retail and real estate.

In addition to standard incentives for energy-efficient heating and cooling systems, refrigeration equipment, lighting, variable-frequency drives and custom measures, we offer incentives for whole building systems and new construction

## Four Easy Steps to Get Started

Contact the PECO team, and we'll help you:

1. Evaluate your energy efficiency opportunities.
2. Choose qualifying equipment and measures.
3. Apply for your incentives.
4. Enjoy all the benefits of energy efficiency.

### New Construction—Whole Building<sup>†</sup>

Comprehensive, building-wide measures including improved building envelope, lighting, HVAC, and controls are eligible.

A Design Incentive is available for Energy Model Based New Construction whole building projects.

### New Construction—Lighting<sup>††</sup>

Projects that have Lighting Power Density (LPD) Reduction: >5% Improvement Over Code are eligible.
